

NEWS FROM ROOM 36!

May 30 - June 3, 2016

Weekly Specials:
 Monday - Art, Music
 Tuesday - Phys. Ed.
 Wednesday - Technology
 Thursday - Library
 Friday - Phys. Ed.

The Field Trip to Reid State Park is this Friday. If you are planning to chaperone and haven't sent in your volunteer form, please get it in on Tuesday. Thank you!

I have enjoyed working with your children this year, and hope you all have a wonderful summer!

Math Learning Plan: This week we will continue to work on multiplication and division skills, and also look at sequencing and patterns in numbers. There will be no homework this week.

ELA Learning Plan: Keep reading at home from Good Fit books! There are many good books you can read to and with your children. Ask your child about his or her favorite books. Libraries in China have many choices for reading, and you can borrow the books for free!

This week we will be working with writing to support the science learning topics, and reading more about tide pool creatures. We will be reviewing sentence structure and the parts of speech. Next Monday, the 13th, is our last Read-In of the year. Readers may bring in favorite books to read, and either a pillow or blanket to make themselves comfortable and a small stuffed animal to read with.

Content: We are still looking at ocean environment, with a focus on tide pools, and at adaptations in animals and plants living in the tidal zone. This will culminate with the field trip on Friday.
